

SPITFIRE

WHITEPAPER

| Preface |

The spitfire coin is a coin that will be used to make purchases of World War II Plane model NFTs.

The purpose of this coin is to be able to exchange it for different World War II Plane NFTs that will constantly come out as time progresses. The NFTs will be full Plane models, having full descriptions, serial numbers which follow real life production numbers as well as launch dates.

The main goal of SpitFire is to gain the attraction of all the World War fans, where they'll have the ability to buy, sell, swap as well as collect different World War II plane NFTs.

Overtime we plan to make more than just plane models from World War II, but also other types of vehicles.

The coin is also planned to be listed on Uniswap and more exchanges as time goes by.

There are also plans to create a mobile app for SpitFire and the NFTs that come with it.

| Presale |

The Presale is happening on DxSale via MetaMask. To prevent whales and dumps of the coin, the coin will only be able to be purchased for 0.05 to 1 BNB, with the softcap being at only 25 BNB

The token was created with a 100 million limit with long liquidity lock as well as governance

There are 3 dev wallets, them having a 6% split

-The 1st wallet contains 5% (5 Million Tokens) and is used for airdrops and such. The wallet will not be locked

-The 2nd and 3rd wallets are unlocked dev wallets, holding 0.5% (500 Thousand Tokens) each for partially financing the project itself

Presale Address: 0xb6f0dAE9A918f419eB343CEfCb981A8518C836A4

Token Address: 0x3fCc7b95d3a4f347F8A45cD07E1385b2c32e706b

| Transparency |

We have a team that's nearly always active on Telegram, which you can join by visiting the website.

We always try to answer all the questions to our fullest capacity, as often as we can. The whole team has high expectations of this project and believe that it can go far. There are no plans of abandoning this project because we believe that it'll bring great success not only to us, but to all of the people that supported and invested in us.

We're willing to invest as much as we can in order to see this project succeed because of our belief in its success.
